Labor's Research and Analysis Bureau Launches Podcast Option for EAG

HELENA, Mont. --- The Research & Analysis Bureau of the Department of Labor and Industry adds a digital media file, Podcast option, to entice next generation users and media outlets to open the pages of the state's monthly Economy At a Glance (EAG) publication.

"Listeners will hear current state and county unemployment rates, labor force participation, employment information and a feature article rather than having to print or read the publication," said Deputy Bureau Chief Annette Miller.

The podcast format can be downloaded to a computer or mp3 player. To access the podcast from the Bureau's website visit www.ourfactsyourfuture.org and click on Publications & Articles and then the Economy At a Glance button.

Currently the Bureau publishes the Monthly Economy At a Glance (EAG) on the web and in hardcopy circulation. The feature article for this edition is "Addressing the Coming Labor Shortage" by Economist Tyler Turner.

"Podcasts will be released at the same time as the print publication," Miller said.
